

Manual HEUSSER-Inset Locks

■ Manual Content

Dear customer, thank you for purchasing this tested Swiss quality product, which was developed and produced in Switzerland. These instructions are a part of the product. They are intended for both the installing technician and the user of HEUSSER-Inset Locks. Please familiarise yourself with all available information and recommendations before installing or using your product.

The product may only be installed and used in accordance with the areas of application specified in these instructions.

Please ensure that these instructions are provided to the contractor when the property is handed over.

■ Mutual screwing of the HEUSSER-Inset Locks

HEUSSER-Inset Locks / Plates are installed on both sides of the door and screwed together whenever possible. This ensures that emergency doors are properly and securely fastened.

Diagram: Example installation of HEUSSER-Inset Lock

■ Assembly Instructions

Installation of the HEUSSER-Inset Locks

1. Prepare fasteners (from p. 8)

Screws:

Standard screws
for mutual screw
connection

M4x6  
 M4x8
 M4x10
 M4x12
 M4x14
 M4x16
 M4x18
 M4x20

Screw for optics and
burglary protection:

M4x5B  

Threaded sleeves:

Threaded sleeves
for threaded sleeve
connection

H7  
 (M4Ø6x7)
 H14  
 (M4Ø6x14)
 H22  
 (M4Ø6x22)

Threaded pin:

Threaded pin for
threaded sleeve
connection

ST8  
 (M4x8)

Blind nut:

Blind nut for small door
thicknesses

BM4  
 (M4)

Loctite 270:

2. Connect the fasteners with the Inset Lock on the outside of the door

Exterior of the door

3. Pre-assemble the Inset Lock for the outside of the door

Exterior of the door

Interior of the door

4. Push the Inset Lock for the inside of the door into the pocket and screw it

Exterior of the door

Interior of the door

■ Combinations of the HEUSSER-Inset Locks

S9.42 in combination with:

HEUSSER-Inset Locks	from door thickness of	page
S1.0 (S1G.0)	43 mm	08 - 09
Sx.13	59 mm	10
Sx.20	66 mm	11
S9.42	88 mm	12
S6.42	88 mm	13

S6.42 in combination with:

HEUSSER-Inset Locks	from door thickness of	page
S1.0	56 mm	14
Sx.13	73 mm	15
Sx.20	80 mm	16
S6.42	102 mm	17

Sx.20 in combination with:

HEUSSER-Inset Locks	from door thickness of	page
S1.0	34 mm	18
Sx.13	51 mm	19
Sx.20	58 mm	20
S6.42	80 mm	16

■ Combinations of the HEUSSER-Inset Locks

Sx.13 in combination with:

HEUSSER-Inset Locks	from door thickness of	page
S1.0	27 mm	21
Sx.13	44 mm	22
Sx.20	51 mm	19
S6.42	73 mm	15

S1.0 in combination with:

HEUSSER-Inset Locks	from door thickness of	page
S1G.0	27 mm	23

S1G.0 in combination with:

HEUSSER-Inset Locks	from door thickness of	page
S1G.0	27 mm	24

Sx.13: All Inset Locks of the different series with the depth of 13 mm

Sx.20: All Inset Locks of the different series with the depth of 20 mm

■ S9.42 + S1G.0

■ Determine the length of the handle pin

It is necessary to determine the correct length of the handle pin in order to install the HEUSSER-Inset Lock in compliance with the standards. To do this, please proceed as follows:

1. Determine the distance from the outside of the door to the centre of the lock (D).
2. Find your Inset Lock / Plate with the handle used in the table.
3. Determine your pin length (P) according to the specifications.

	Handle D1	Handle D2	Handle D3	Handle D4
Inset Lock S1.0	$P = D + 19$	$P = D + 34$	$P = D + 19$	$P = D + 34$
Inset Lock S3.13	$P = D + 4$	$P = D + 19$	-	-
Inset Lock S3.20	$P = D - 2$	$P = D + 13$	-	-
Inset Lock S6.13	$P = D + 4$	$P = D + 19$	-	-
Inset Lock S6.20	$P = D - 3$	$P = D + 12$	-	-
Inset Lock S6.42	$P = D - 23$	$P = D - 10$	-	-
Inset Lock S9.13	$P = D + 4$	$P = D + 19$	$P = D + 4$	$P = D + 19$
Inset Lock S9.20	$P = D - 3$	$P = D + 12$	$P = D - 3$	$P = D + 12$
Inset Lock S.9.42	$P = D - 3$	$P = D - 10$	$P = D - 3$	$P = D + 12$

P = Pin length to centre of lock

D = Distance from outside of the door to centre of lock

All dimensions are in millimetres

■ DIN EN 179 Usage

The handles and locks for emergency exit locks are a safety-relevant assembly that can save human lives. The standards provided for this purpose must therefore be strictly adhered to.

If you have any questions or are unsure about something, please contact your specialist dealer, door planner or architect.

■ DIN EN 179

Suitable HEUSSER-Inset Locks

Handle D2 with all
HEUSSER-Inset Locks

Handle D3 with
HEUSSER-Inset Lock S9.42

Handle D4 with all
HEUSSER-Inset Locks

■ Colouration HEUSSER-Inset Locks

Would you like the colour of your inset lock to match your door or interior design?

Then you can purchase HEUSSER-Inset Locks powder-coated or painted in your desired RAL or NCS colour.

■ Legend

Nomenclature HEUSSER-Inset Locks

Order code

SD.MT.DD.A BC AD

SD: Series Design (S1, S3, S6, S9)

MT: Tray depth (0, 13, 20, 42 [mm])

DD: Handle Design (D1, D2, D3, D4)

A: Cutout (0 = blind, 2 = round cylinder, 3 = profile cylinder)

BC: Distance (RZ = 74, 78, 94 oder PZ = 60, 72, 78, 88, 92)

AD: Direction of Handle (L for left-pointing, R for right-pointing)

Sample HEUSSER-Inset Lock:

S9.20.D3.0R

Sample HEUSSER-Inset Lock:

S1.0.D4.372L

HEUSSER-Inset Locks Series 9

S9.42.D3
Tray depth: 42 mm
Handle overlap: 0 mm

S9.20.D3
Tray depth: 20 mm
Handle overlap: 0 mm

S9.13.D3
Tray depth: 13 mm
Handle overlap: 7 mm

S9.42.D4
Tray depth: 42 mm
Handle overlap: 24,5 mm

S9.20.D4
Tray depth: 20 mm
Handle overlap: 24,5 mm

S9.13.D4
Tray depth: 13 mm
Handle overlap: 31,5 mm

 Flush-mounted handle
 Emergency doors suitable and tested according to DIN EN179

HEUSSER-Inset Locks Series 3

S3.20.D1
Tray depth: 20 mm
Handle overlap: 0 mm

S3.13.D1
Tray depth: 13 mm
Handle overlap: 7 mm

S3.20.D2
Tray depth: 20 mm
Handle overlap: 26 mm

S3.13.D2
Tray depth: 13 mm
Handle overlap: 33 mm

HEUSSER-Inset Locks Series 6

EN179

S6.42.D2

Tray depth: 42 mm
Handle overlap: 4 mm

EN179

S6.20.D2

Tray depth: 20 mm
Handle overlap: 26 mm
